Bodyguard Yukio (Rila Fukushima) accompanies Logan (Hugh Jackman) to a sacred event.

A large, high-contrast photograph of Wolverine (Hugh Jackman) shirtless, showing his muscular physique. He is holding his adamantium claws in his right hand and looking intensely at the camera. The background is a blurred indoor setting with a window.

The Wolverine

The newest X-Men installment promises plenty of slicing and dicing for everyone's favorite Canadian mutant.

by CASSIE JASINSKI

Hugh Jackman wasn't the original choice to play Wolverine (a.k.a. Logan) in *X-Men*, which commenced filming September 1999 in Toronto. The role was first offered to Russell Crowe, who rejected it. Then Scottish actor Dougray Scott, who was hot off his role in the romantic drama *Ever After* with Drew Barrymore, was cast as Wolverine. However, when filming began on *X-Men*, Scott was still working on *Mission Impossible II* with Tom Cruise, which went over schedule.

Jackman took his place and shot to fame with his spot-on portrayal of the Canadian loner, Logan. Not only did he play the part well—getting the accent and attitude down perfectly—he also nailed the physical appearance of the rebellious mutant.

Other *X-Men* movies quickly followed—*X-Men 2: X-Men United*, *X-Men 3: The Last Stand*, *X-Men Origins: Wolverine* and *X-Men: First Class*. Despite the presence of popular mutants like Nightcrawler, Jean Grey, Professor X and Cyclops, it was Wolverine who drove the series forward and was a major character in all of the movies except for *X-Men: First Class*.

Jackman took a bit of a break from playing his blockbuster hero in between the Marvel films, demonstrating his versatility as an actor. He provided voice work in *Happy Feet* and *Flushed Away* and worked on movies like *The Prestige*, *Australia* and *Real Steel*.

For his performance in *The Boy from Oz* on Broadway, he received a Tony Award and then earned an Oscar nomination for playing Jean Valjean in *Les Misérables*. Thankfully for Marvel fans, old habits die hard; Jackman decided to return as everyone's favorite angry, adamantium-clawed mutant for the sixth time on the big screen in *The Wolverine*.

Viper (Svetlana Khodchenkova) tries to trap Logan (Hugh Jackman).

“It definitely feels like a standalone movie in every way. I always hated the idea of saying Wolverine 2.”

The movie, directed by James Mangold, who worked with Jackman on *Kate & Leopold*, is a sequel of sorts that takes place after the events in *X-Men: The Last Stand*. However, Jackman told slashfilm.com: “It definitely feels like a standalone movie in every way. I always hated the idea of saying *Wolverine 2*.”

The idea for the film came from Marvel's 1982 limited graphic novel series *Wolverine*, created by Chris Claremont and Frank Miller. In the film adaptation, Logan travels to Japan, where he's offered the chance of a lifetime by a man he once saved, to forgo his immortality. In the inevitable course of events, he runs into numerous foes and must fight for his life while at his most vulnerable.

The plot essentially continues the trajectory of X2 by touching on Logan's past and its effect on his present. For

example, the new movie flashes back to scenes in a WWII Japanese POW camp and will answer some more questions about Logan's life before he joined the X-Men.

Fans of the series itself will be pleased to know that a number of characters from the graphic novels appear in *The Wolverine*, including fighter and ally Yukio, as well as Mariko, traditionally Logan's love interest. Among his many opponents, Wolverine will face off against the deadly Viper and the heavily-armored, katana-wielding Silver Samurai.

Shot in Australia and Japan with a bevy of Japanese talent, the movie boasts ample action, including a bullet train fight. Fans of the *X-Men* franchise will be pleased to know that, although this is Wolverine's story, at least one other member of the team appears in the film: Logan's lost lady love Jean Grey will appear in flashbacks and dreams.

Jackman discussed her role in *The Wolverine* with MTV, saying, “She has a presence, which I think is vital to the movie, particularly for him confronting the most difficult thing within himself.” According to Jackman, the new movie is darker than the previous films.

Along with crazy action scenes, there's also a fair bit of introspection; Wolverine has to deal as much with his inner enemies as those that attack from without. Those folks hungering for more mutants can catch Jackman again in *X-Men: Days of Future Past* next summer when he appears once more alongside his adopted family.

Mariko (Tao Okamoto) and Logan (Hugh Jackman) escape through a casino.

ELYSIUM has a timely theme—the multi-city Occupy movement, in which protestors stood up against social and economic inequality, is still fresh in most people’s minds.

In the movie, the gap between the rich and poor has widened so far that they don’t even live on the same planet. A small number of wealthy humans live in a utopian world called Elysium, on an orbital space station. There’s no sickness—they have machines that scan for disease and remove it if anything is found. Their peaceful world is beautiful and they live the life of the privileged. It’s also the most heavily guarded place in the universe.

Meanwhile, the poor struggle to survive on an overpopulated, crime-ridden, rubble-covered Earth. The people who live there would do anything to get to Elysium. Matt Damon plays an ex-con who’s dying and is desperate to get to the space station to obtain health care, while Jodie Foster plays a politician who wants to keep Elysium’s habitat pure and save it, as she stated in a press conference, “from those pesky earthlings.”

Damon says, “It certainly has a lot of relevance. Funnily enough, the whole terminology of the 99 per cent and the 1 per cent wasn’t even there when we started.” However, *Elysium* isn’t all doom and gloom. Damon assures, “I think first and foremost, it will be really entertaining.”

Elysium

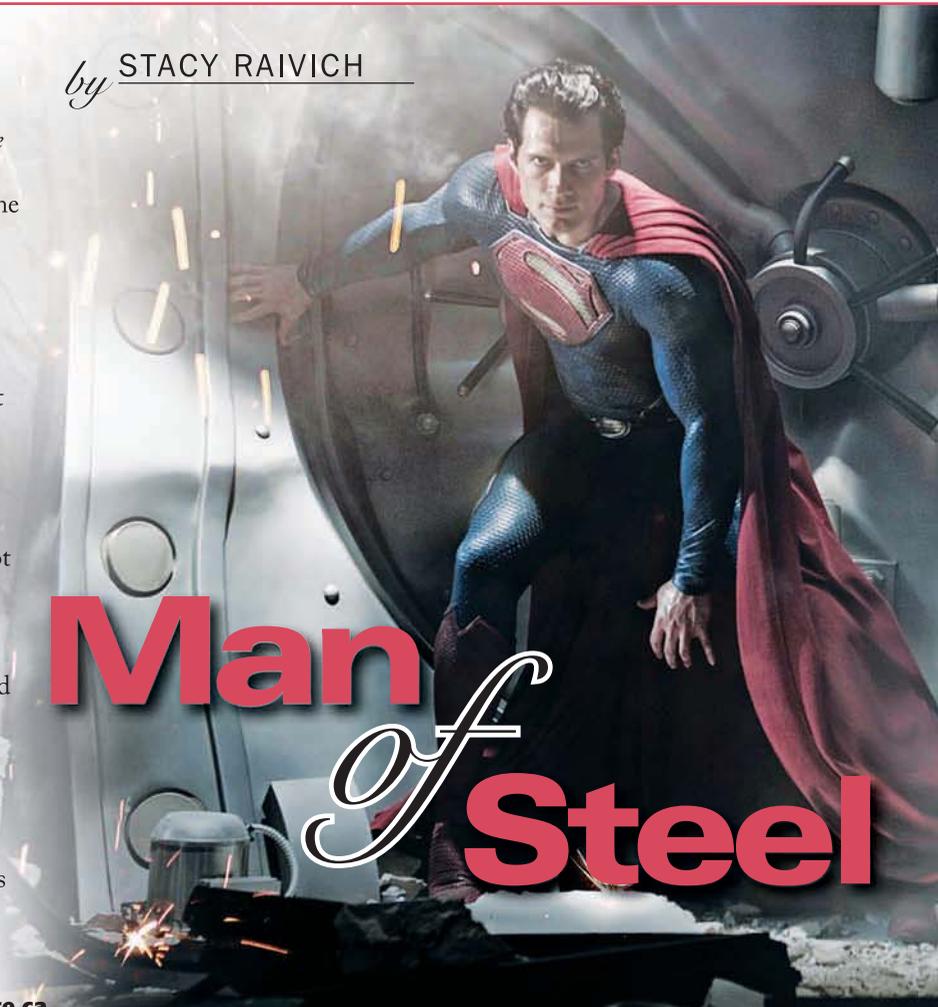

COMIC book movies have been HOT for the last couple of years—from *The Avengers* to *The Dark Knight Rises* to *X-Men* reboots and *The Amazing Spider-Man* films—and it doesn’t look like the trend’s dying out any time soon. Only one superhero has been missing in recent years—Superman—but that is about to change. The beloved superhero returns to the big screen in *Man of Steel*. Henry Cavill stars as Clark Kent (a.k.a. Superman), the infant Kryptonian sent to Earth, only to be adopted and raised in the quiet Kansas town of Smallville.

As the young man grows up, he understands his destiny to protect the world from evil and save mankind while keeping his identity a secret—posing as a newspaper reporter when not fighting crime.

Interestingly, Cavill is the first non-American actor to be cast as Superman in a feature film. Why the change? Director Zack Snyder explained in an interview with *GQ*: “He is very earnest,” adding, “He does have a lot of the qualities that you would hope for in Superman. And they’re not put on.”

Man of Steel sticks to the classic trademarks and storylines of the *Superman* universe, but puts a new spin on it, using impressive special effects and making it more relevant for new audiences.

THE MORTAL INSTRUMENTS: CITY OF BONES

The *New York Times* bestselling book series *The Mortal Instruments* is coming to the big screen with *The Mortal Instruments: City of Bones*, an adaptation of the first novel in the series by Cassandra Clare. Lily Collins was cast in the lead role as Clary, a teen who finds out she has special powers when she realizes she can see people who are invisible to everyone else. When her mother is attacked and goes missing, Clary goes on a quest to find her.

by BONNIE LAUFER KREBS

■ **Did you think, “This is my role” when you read the books?**

No, I was just a fan, but I saw a lot of similarities with Clary because my mom and I are best friends. If anything ever happened to her I would do anything to get her back. So when I was approached about it, it was really special because I was a fan becoming an actual character in a book.

■ **What did you have to do to transform into the character?**

I did three months training with a physical trainer before the film. We did close combat fighting, practicing with reactions and falls and all that. It was mainly a lot of physical training but I also read the book again, to really go over Clary’s voice.

LILY COLLINS

■ **What was it like having Jonathan Rhys Meyers play your dad?**

Jonathan is so talented, it ups your game. You know, he intensified all of us and brought new things out of us, especially for Clary’s character. He would improv a line when I wasn’t expecting it, to scare me. It did scare me but then between takes he’s like, “Are you okay? Let’s work through this, let me fix your hair.” He’s a lovely man and he’s the perfect choice for Valentine.

■ **How about Jamie Campbell Bower?**

I can’t explain the feeling when you just know that person has to be cast as this particular person because they share every quality that character has. Jamie is such an amazing actor and we all have so much fun. When we’re not shooting, we’re just playing around, just joking and laughing. But I’m really excited for everyone to see what Jamie can bring, especially because of the backlash he got from fans when he was cast. I truly believe there’s no one else that could have played it like him.

JAMIE CAMPBELL BOWER

Jamie Campbell Bower plays Jace, a Shadowhunter who protects humans from demons. He becomes romantically involved with Clary as he helps her search for her mother.

■ **Had you read the books?**

I hadn’t read the books when I first saw the script. But once I read the script I automatically connected with the character.

■ **Could you talk about your bond with Lily Collins?**

I can! We did the chemistry test together and immediately there was this sort of raw connection. There’s this connection I have on camera with Lily, which works so well and makes it so easy to go to work every day.

■ **How do you know when chemistry between actors works?**

People can see it. I think it was one of the big reasons that I was put in this role, because at the time I went for the screen test, physically I wasn’t the image of who the character is. I think they saw a connection between us and they were like, “That’s it! They are the characters.”

■ **What is the hardest part of Jace’s character?**

I love him because he’s so rude. He’s such an asshole and I love that. And that’s what I have the most fun with. It’s very rewarding to explore different sides of a character.

■ **Did you bulk up a little bit physically?**

I actually slimmed down quite a lot. I was a big boy. I was a fat guy. There was no muscle on me at all so I went into the gym three months before and sort of toyed around with different body shapes. Then I made the decision to really slim down; really tone up—there’s not an ounce of fat on this guy because there was a scene in the book where they’re eating and he just doesn’t eat.

■ **Does the tattoo work take a long time?**

Yeah. I’ve got real tattoos that had to be covered up and then put other ones on top of that. It’s a good three hours in the chair but it’s fundamental to who the character is and it helps me get into that space. The costume, the makeup, that half hour in the morning when you’re sitting on your own and putting stuff on is the time that you have to be able to slip into character.

Rising star dishes on being part of the A-list cast of *Kick-Ass 2*

by SORIYYA BAWA

Photo: Nabil Rahme

Claudia Lee found fame after landing a starring role on the hit television series, *Hart of Dixie*. She'll be making her big screen debut playing Brooke in the action comedy sequel *Kick-Ass 2*, alongside an A-list cast including Chloë Grace Moretz, Aaron Taylor-Johnson, Jim Carrey and Nicolas Cage. *Tribute* chatted with the young star to find out how "kick-ass" the experience really was.

■ How would you describe your character in the film?

I play Brooke; she's Mindy's nemesis. Brooke is introduced in the *Kick-Ass 2* movie in Mindy's school life and she's very manipulative—she can manipulate people in order to get what she wants. She is in charge—you don't want to be on her bad side. She's a really fun character to play and I've been searching for a role like this for a long time. When *Kick-Ass 2* came out, I was like, "Oh my gosh, this is perfect!" It's so different. It's so dynamic.

"She's a really fun character to play and I've been searching for a role like this for a long time!"

■ Were you a fan of the first *Kick-Ass* movie before you took on this role?

I'm a huge fan of *Kick-Ass*! And also I love all the comic books. I know this kind of sounds nerdy but when I was younger, my cousin and I would read them over and over again, so I totally grew up with that.

■ How did you land the role?

I was taking a holiday in the summertime and they wanted to see me so they asked, "How about if you send a tape? Wait, no. We really want to see you in person." I guess things work out when they're meant to be. I'm just so glad they picked me because I really fell in love with this character. She's such a cool, edgy character.

■ Where did you film and what was it like working with the cast?

We were working at a school in Hamilton [Ontario] and it's the same school they filmed at when they did the first *Kick-Ass*. Aaron [Taylor-Johnson] is very cool. I love his work. I really respect him as an artist because he's so good at his craft. And I love Chloë; she and I hit it off like BFFs, like we knew each other for so long and we all had such a great time. It's really a wonderful group of people.

■ How did they work Nicolas Cage's character into the sequel?

It's a flashback scene involving Chloë's character, Mindy. But I think it's great that he's coming back because his work also is so phenomenal. The first *Kick-Ass* with him was super cool; Big Daddy was such a cool character. And his relationship with Mindy was so well received.

Pacific Rim

Charlie Hunnam

by CASSIE JASINSKI

SUMMER wouldn't be complete without a monster movie. This year, it will be provided by scare-meister Guillermo del Toro. Del Toro is at his creative best when he's flexing his monster-making muscles—remember the Pale Man from *Pan's Labyrinth*? For *Pacific Rim*, he's crafted Kaiju: geologically-inspired creatures as tall as buildings that look like a mix between the Balrog from *The Lord of the Rings: The Fellowship of the Ring* and Jabba the Hutt's rancor.

They rise up out of an inter-dimensional portal in a crack in the Pacific Ocean and wreak havoc on human civilization. In response, humans produce equally monstrous robots called Jaegers, which are controlled by two mind-linked pilots – but even these can't stop the damage. As a last response, the armed forces of the world call on a former pilot (Charlie Hunnam) and a trainee (Rinko Kikuchi) to operate a legendary Jaeger and stop the Kaiju once and for all.

This is del Toro's most colossal project ever. At Wondercon 2013, he described the scale of the production. For some scenes, they built a Jaeger head, several stories high and completely mechanized. When speaking about his affinity for monsters, the director told *Tribute*, "If you gave me a full scholarship to design monsters the rest of my life, that's what I would do because I do think there is a whole world of monsters in my head since I was a kid that is waiting to come out."

Rinko Kikuchi

WHEN you're dead, you're dead, right? Not necessarily. Not in *R.I.P.D.*, better known as the Rest In Peace Department. This 3D supernatural action/adventure, based on the Dark Horse comic, brings together a charismatic cast, featuring Ryan Reynolds, Jeff Bridges and Kevin Bacon.

During a stakeout gone wrong, police officer Nick Walker (Reynolds) is shot and killed. He's summoned to heaven by Proctor (Mary-Louise Parker) and enlisted in the undead police division to track down the man who

a radical change as he transforms into an old Chinese man, while Pulsifer morphs into a stunning blonde bombshell.

The fun comes from watching the hilarious dialogue between Reynolds and Bridges as they uncover a plot that could destroy life as we know it, and must find a way to restore the cosmic balance. It's also entertaining to witness dangerous stunts and accidents, knowing the undead cops can't be injured because they're already dead.

Contrary to popular belief that death may be the end, for Walker and Pulsifer, death is only the beginning.

murdered him and protect the living world from evil spirits who refuse to cross over to the other side.

The recently deceased cop is teamed up with another ghost—wise-cracking Roy Pulsifer (Bridges), a grizzled Old West Sheriff. His job is to teach the rookie to defend the world, one soul at a time, by capturing destructive men and women hiding among the living and sending them packing for the afterlife.

Complicating matters, the two ghost cops don't look like themselves to the outside world. Walker's appearance takes

THE HEAT

June 28 | Comedy

Sandra Bullock, Melissa McCarthy,

Demián Bichir, Marlon Wayans,

Michael Rapaport

An uptight FBI agent (Bullock) teams up with a foul-mouthed Boston cop (McCarthy), neither of whom has ever had a partner before. They have to learn to respect each other in order to take down a ruthless drug lord.

Buzz: The movie was filmed in Boston last summer. Sandra Bullock hosted a special advance screening of the film for Boston police officers to commemorate those affected by the marathon bombings.

protecting President James Sawyer (Foxx), he takes his daughter on a tour of the White House anyway. The complex is overtaken by a heavily armed paramilitary group and it is up to Cale to save the president, his daughter, and the country.

Buzz: Channing performed almost all of his own stunts in the film, including one that earned him a big bruise on his butt.

GROWN UPS 2

July 12 | Comedy

Adam Sandler, Kevin James, Chris Rock, David Spade, Salma Hayek Lenny Feder (Sandler) moves his family back from the big city to his quiet hometown, where he and his four best friends grew up. The tides have turned, and now, on the last day of school, it's up to the children to teach their parents a lesson.

Buzz: With the profit Sandler made from the success of the 2010 movie *Grown Ups*, he bought all his male costars Maseratis. Sandler has implied that if the sequel does better, he will get Hayek (his on-screen wife) something even better.

Grown Ups 2

THE CONJURING

July 19 | Thriller

Vera Farmiga, Patrick Wilson, Ron Livingston, Lili Taylor, Joey King

Infamous paranormal investigators Ed and Lorraine Warren (Wilson, Farmiga) are called on to help when a family is terrorized by a dark presence in a secluded farmhouse.

Buzz: This is based on a true story—Ed and Lorraine Warren formed the New England Society for Psychic Research in 1952 and have investigated thousands of hauntings.

THE SMURFS 2

July 31 | Family

Neil Patrick Harris, Brendan Gleeson, Sofia Vergara, Katy Perry

The Smurfs venture into the human world once again to save Smurfette, who has been kidnapped by the evil sorcerer Gargamel, because she is the only one who knows how to turn his evil minions into real Smurfs.

Buzz: The late comedian Jonathan Winters provided the voice of Papa, the oldest Smurf, in what was his last movie role.

Turbo

TURBO

July 17 | Family

Ryan Reynolds, Paul Giamatti, Bill Hader, Snoop Dogg

A garden snail named Turbo dreams of becoming the world's fastest snail, but his obsession with speed makes him an outsider in his snail community. He sets off to compete against the best racers IndyCar has to offer.

Buzz: A spin-off TV series called *Turbo: F.A.S.T.* (Fast Action Stunt Team) will debut on Netflix this December and will be the first original Netflix series for children.

RED 2

July 19 | Action

Bruce Willis, John Malkovich, Mary-Louise Parker, Catherine Zeta-Jones

CIA agent Frank Moses (Willis) reunites his team of elite operatives on a large scale quest to track down a missing nuclear device. They have to endure an army of relentless assassins, ruthless terrorists and power-crazed officials all eager to get the weapon.

Buzz: The original movie was based on the DC comic book series in which Frank was a loner who had no friends or former associates to call on.

The Smurfs 2

by ALEXANDRA HEILBRON

FROM the earliest silent films, books have been the inspiration for many great movies. One of the first movies adapted from a book was the 1986 dramatic short *The Awakening of Rip*, based on Washington Irving's *Rip Van Winkle*.

The trend continued and books were eventually made into feature length films, such as *Daddy-Long-Legs* starring Mary Pickford in 1919, based on the bestselling book by Jean Webster.

To Kill a Mockingbird is known as one of the finest book-to-film translations, earning eight Academy Award nominations and winning three of the coveted statues, including one for Gregory Peck in the role of Atticus Finch.

Chloë Grace Moretz in *Carrie*

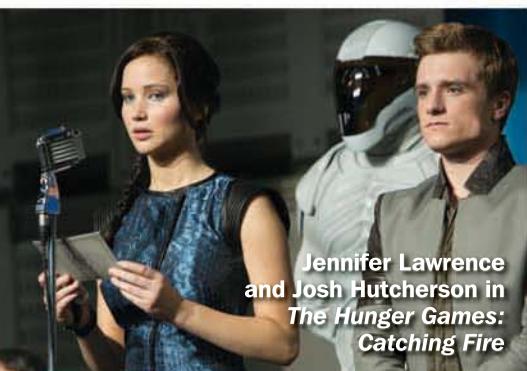

Brad Pitt in *World War Z*

Hailee Steinfeld and Asa Butterfield in *Ender's Game*

From Page to Screen

Jennifer Lawrence and Josh Hutcherson in *The Hunger Games: Catching Fire*

Whether you love them or hate them, book-to-movie adaptations are here to stay. No less than the fifth movie adaptation of F. Scott Fitzgerald's classic novel *The Great Gatsby* was released this year. Here's a look at some of the page-turners that have been popular with movie audiences through the years.

Numerous books each year are transferred to the big screen—some of the biggest in recent years have been based on the *Harry Potter*, *Lord of the Rings*, *Twilight* and *Bourne* series of books. And who can forget that James Bond originated in the 1953 novel *Casino Royale* by Ian Fleming?

In the next few months, several more highly-anticipated book adaptations are hitting the big screen, including Max Brooks' *World War Z* starring Brad Pitt and Stephen King's *Carrie*, starring Chloë Grace Moretz. Take a look at a selection of the movies coming out this year, based on popular novels.

2013 BOOK-TO-MOVIE ADAPTATIONS

- The Spook's Apprentice* (retitled *The Seventh Son*) by Joseph Delaney
- Ender's Game* by Orson Scott Card
- The Mortal Instruments: City of Bones* by Cassandra Clare
- Paranoia* by Joseph Finder
- Percy Jackson: The Sea of Monsters* by Rick Riordan
- Catching Fire* by Suzanne Collins
- The Monuments Men* by Robert M. Edsel
- The Secret Life of Walter Mitty* by James Thurber

JULY/AUGUST

JULIANNE HOUGH – Cancer, born July 20, 1988 Salt Lake City, Utah
Born on the talented Cancer-Leo cusp, Julianne was destined to have many artistic outlets to choose from. With a strong Libra moon, a sign associated with dancing, she first rose to fame as one of the professionals on *Dancing With the Stars*. Now she's added country music singer and actress to her resumé. Julianne seems to fare better with the critics when she takes on roles in musicals than with her dramatic turn in *Safe Haven*. She's getting rave reviews on the dating scene after the breakup with Ryan Seacrest earlier this year, and likely will prefer to play the field for a while.

Star Struck

What the stars have planned for you

by **SUSAN KELLY**
ASTROLOGER

ARIES (March 21 – April 20)

Expect a few retakes in the home scenario as summer begins. You might have to revisit a project you thought was a wrap, or in other ways finish up past business. Meanwhile, your star is rising on the social scene and at work, with plenty of diversions and good times ahead. Best vacation time: first two weeks of August.

TAURUS (April 21 – May 21)

Luck is on your side as summer begins. Friends and associates will provide the keys that open new doors of opportunity. Home is where your heart is throughout August, and the romance potential is sky-high. Early in the month looks best for a staycation or taking a break at a nearby destination.

GEMINI (May 22 – June 21)

Stuck in the summer doldrums? Not for long! A big break in the form of a bonus or job offer could strike like summer lightning. With Mercury retrograde for most of July, it's best to not make firm commitments. Meanwhile, your social life is a breeze, and a big trip could be on tap for late August.

CANCER (June 22 – July 22)

The stage is set – so why do you feel like you have the wrong script? With Mercury retrograde until July 20, expect mix-ups that are beyond your control. Relax; big and positive changes are afoot all summer long. A new or renewed romance brings a breath of fresh air mid-August, as does a last-minute getaway or two.

LEO (July 23 – August 23)

The sun shines in your financial sector. Expect to see an angel appear, as in someone ready to provide much-needed financial backing. Others prove highly significant, from your life co-star to minor players. The potential is there to forge fulfilling new partnerships, and romance flourishes while on vacation.

VIRGO (August 24 – September 23)

Vacation plans not panning out? Mercury retrograde brings the usual mix-ups, delay and confusion until July 20th. But most of the summer, your efforts prove pure gold to decision-makers, who will take a shine to you. Early August is best for hitting the hammock and doing as little as possible.

LIBRA (September 24 – October 23)

You're in the limelight through most of July. It's an optimal month to apply for a promotion or send out resumé. Just don't accept any new position until after the 20th. Your social life gets a boost, likely through a club or organization you belong to. Mark mid-August as best for a getaway.

SCORPIO (October 24 – November 22)

What vacation? Positive influences abound in your career house, so it may have to be postponed. Do watch a tendency to speak your mind too bluntly, especially around higher-ups. It's clear sailing on the social front, and you might test the waters of a new romance. If you can get away, the last week of July looks best.

SAGITTARIUS (November 23 – December 21)

Travel plans could derail in July, likely because you're needed at home. It's a great time for home improvements, either renovating or moving up. Meanwhile it's full speed ahead in your social life. Apply the brakes and take it slower to avoid a summer romance meltdown. You finally hit the road late in August.

CAPRICORN (December 22 – January 20)

It's all about relationships throughout July. You may find a valued mentor or a summer romance is not out of the question. "Where does the money go?" is a question you'll finally answer in August. As well, you can cash in any unused vacation days then, as trends favor a getaway almost all month long.

AQUARIUS (January 21 – February 18)

Your charisma soars with the temperatures, and you just might set a record. New people and situations now enter your orbit. Focus on career advancement in July, and partnerships and close relationships in August. A summer romance is likely in the script, as is a chance to travel on business.

PISCES (February 19 – March 20)

Hit the road early in July. Despite a few mixups in schedules, the first two weeks are optimal for getting away from it all. A summer course or skills refresher could be life changing. August will be hectic, so make sure you maintain a healthy lifestyle, getting enough sleep especially, to keep in top shape.
